A Message From the Highway Commissioner

Dear Resident:

The Winfield Township Road District is pleased to provide this resident handbook. Information in the handbook addresses the most often asked questions regarding services and information for the 40 miles (80 lane miles) of Road District maintained roads in the unincorporated areas of Winfield Township. Be sure to note the list of important dates, especially for brush pick-up. Start date for leaf pick-up will be announced later in the year.

If you have any further questions, suggestions, or concerns please do not hesitate to contact my staff or me. Be sure to give a contact name, address and phone number. We look forward to talking with you.

Sincerely,

A handwritten signature of John S. Dusza in black ink. The signature is written in a cursive style, with the first letters of the first and last names being capitalized and prominent.

John S. Dusza

Winfield Township Highway Commissioner

Road District

John S. Dusza, as Highway Commissioner of Winfield Township Road District, maintains 40 miles (80 lane miles) of road right-of-ways (ROW) which are many of the streets in the unincorporated areas of Winfield Township.

The Road District does not maintain State, County Municipal or private roads. The road ROW consists of the paved street, gravel shoulder and an additional area that is used for drainage. The width of the ROW's can vary; contact the Road District office to get the width of the ROW of your street. Within the ROW, the Road District assumes many responsibilities. Among these are the following maintenance responsibilities:

Asphalt Patching	Asphalt Re-surfacing
Drainage	Gravel Shouldering
Litter Pick-up	Roadside Mowing
Road Striping	Traffic Control Signing
Winter Tree Removal	J.U.L.I.E. Locates
Winter Snow and Ice Control	

The Township also offers these additional services.

Brush Pick-up
Leaf Pick-up

Your Road District is equipped to handle most of these duties and to contract some with private enterprise. We have excellent intergovernmental cooperation with the municipalities in and around township boundaries. Manpower and equipment are often exchanged to make all of us more efficient.

PERMITS ARE REQUIRED FOR ALL WORK WITHIN THE RIGHT-OF-WAY AND FOR SOME PROJECTS ON PRIVATE PROPERTY.

The following pages will explain how these various programs work, what the Road District is trying to accomplish and how you, the taxpayer, can assist us and benefit from our services.

PERMITS

As stated on the previous pages permits are required for all work except grass cutting in the parkways. ALSO, SOME WORK THAT REQUIRES A DUPAGE COUNTY PERMIT REQUIRES A REVIEW AND A TOWNSHIP ROAD DISTRICT PERMIT/BOND.

Projects requiring County Building Permits but exempt from Township permits and/or bonds are:

Satellite Dishes	Alarm Systems
Signs (except large billboards)	Electrical/Plumbing work

If the permit is for a room addition, shed, etc. the Township will issue a permit and a \$1,000 refundable construction cash bond is required. **The bond is fully refundable after the project is completed and no damage has been found in the Township road right-of-way. It is the homeowner's responsibility to apply for the refund of bond money.**

Should there be any damage to the ditch, the shoulder or the road that is not corrected, we will make repairs and deduct the cost from the bond.

Under no circumstances is the Township Road pavement and /or Road Right-of-Way to be used for dumping of material.

Any time work is done in the parkway or street in front of the property a permit is required. Examples are tree planting, driveway installation or driveway replacement. **It is important that the Road District be notified at least two weeks prior to the scheduled date of driveway improvements. The drainage ditch and condition of the existing culvert will be evaluated.** In some instances, the Township will need to do ditch work or culvert replacement and to avoid having a newly paved driveway disturbed, this should be completed before any driveway improvements have started.

Driveway lights and sprinkler systems cannot be installed in the parkway. They should be installed within the confines of your property. Damage to unauthorized installations is the complete responsibility of the homeowner. **Unauthorized work may be removed and charges for the work assessed to the homeowner.**

Residential Permits

Projects that may require a \$1,500 Bond

New Construction, Replacement or Relocation of Driveway, (\$1,500 per driveway), In-Ground Pool, Sprinkler Systems, Room Additions, Garages, and Concrete Patios

Projects that may require a \$1,000 Bond

Shed (concrete floor)	Paver Brick Patio
Dumpsters	Mailbox Structures

1. Commercial Permit – Rate determined at time of request in the amount of the improvement in the parkway.
2. Red-tagged Projects – Permits are all \$1,500
3. Roofing, Siding, Fences, Sheds, Above-ground Pools need to be reviewed and \$1,000 bond may be required.
4. Residents on private roads are required to apply for permit and bond.
5. **Mailbox structures are a potential hazard and are not condoned by the Township. A homeowner wishing to construct a mailbox structure must obtain a permit to do so. In the event a mailbox structure is damaged, repairs/replacement is the sole responsibility of the property owner.**
6. This is only a guide and is not all inclusive. Permit fees are subject to change. Any expenses (such as lawyer fees, restoration of right-of-way, removal of unauthorized drainage pipe, bank charges for returned checks, etc.) incurred by the Township due to any issue involving a permit are the responsibility of the obligor designated on the permit/bond.
7. **Permit inspections are not conducted during the winter months when snow is on the ground.**

Call the Road District Office, 630-231-8850 to make an appointment.

BRUSH/LEAF REMOVAL PROGRAM

Winfield Township offers brush and leaf pick-up as a service to residents in the unincorporated areas. The Township has *not been* directed by DuPage County to offer these services and the Township is not reimbursed by the County for the cost of supplying these services. Therefore, we ask for your cooperation in following the guidelines.

BRUSH REMOVAL PROGRAM

The Township Brush Removal Program is for the homeowner's convenience. We have a brush chipper designed to chip those limbs and branches that do not qualify as YARD WASTE. Our equipment is not designed to grind small twigs and evergreen trimmings. Your garbage service will take yard waste and roots for nominal cost. **IF IT CAN BE PUT INTO A BAG, THEN IT IS YARD WASTE.**

WHEN: Brush is picked up four (4) times a year which begins the first Monday of April, May, September and October and it takes approximately one week per month to pick up the Township.

WHAT: Brush is hereby defined as trimmings from bushes or shrubs, as well as tree branches from trimming and/or pruning trees. Not considered to be brush are logs, root balls (not dirt), stumps, grass clippings, flowers, weeds, plants, leaves, lumber or anything in plastic bags or other such containers. **This brush pick-up program is for the sole use of the residents of unincorporated Winfield Township, and shall not be used by contractors and/or residents clearing lots for homes, private roads, entrances or more open space.** Cutting down a tree is not considered to be trimming or pruning and the Township will not remove the debris.

GUIDELINES: Brush must not be placed on the parkway any earlier than the Saturday before the scheduled Monday pick-up in the area.

All brush must be cut in lengths up to six (6) feet and no larger than six (6) inches in diameter. **ALL BRUSH PLACED ON THE PARKWAY FOR PICK-UP MUST BE SECURELY BUNDLED WITH BALING TWINE (which can be purchased at your local hardware store) NOT WIRE, and each bundle shall not exceed 50 pounds in weight.**

Cut ends facing out! Not in roadway! For future pickup, brush must look similar to this!

Items that do not conform to these guidelines will not be picked up by the Township and will be the sole responsibility of the homeowner as to their proper disposal.

*Note – Anything over 6” in diameter should be cut into fireplace-length logs and used as such.

Please do not “hide” thorny tree branches (such as Olive or Washington Hawthorne trees) inside piles. Place these next to larger piles and our crews will take them. They need special care; they can cause injury.

If there is a question regarding brush placement, please give our office a call at 630-231-8850.

STORM DAMAGE: One week after a severe storm the Township may start brush pick-up to remove debris. **A severe storm is defined as a storm producing enough damage that the Township road crews need to clear roads and Rights-of-Ways of trees/branches for traffic. Please follow the brush pick-up guidelines; branches need to be bundled and tied securely with baling twine.** Should a tree come down during a storm on private property it is the responsibility of the homeowner for its proper disposal.

Disposal of Christmas Trees – The Road District does not conduct a special pick-up for Christmas trees, the trees will be removed by your garbage hauler.

LEAF PICK-UP PROGRAM

The leaf removal program takes place in the fall and is designed to supplement the homeowner’s leaf disposal responsibilities. **This program is not designed to remove 100% of your leaves. From the start date to the time the snow falls is a very short window of time, therefore the Township guarantees just one pass through the Township.** The Township removes leaves on 48 miles or 96 lane miles of road throughout the Township.

WHEN: **Leaf removal will begin November 13, 2017.** Watch for information in the Fall Winfield Township Newsletter and signs will be placed in your area approximately one week prior to your area’s pick-up date. Once the crews have gone down your street, do not place leaves out, because **the crews will not be back.** Other options for leaf removal are: mulching, hiring someone to rake and haul away the leaves or contacting your garbage hauler for their guidelines.

GUIDELINES:

1. Leaves are not to be placed on pavement or road.
2. Place **loose** leaves, **not mulched**, in a long row, along frontage of property, parallel to edge of road, no further than 5 feet from pavement.
3. If on a street with drainage ditches, please rake leaves between the ditch and edge of the road. Storing leaves in the ditch presents problems during rainstorms.
4. Do not include any other debris such as cans, paper, bottles, rocks, logs, brush, or construction materials. These objects can damage the equipment or cause injury to the crews.

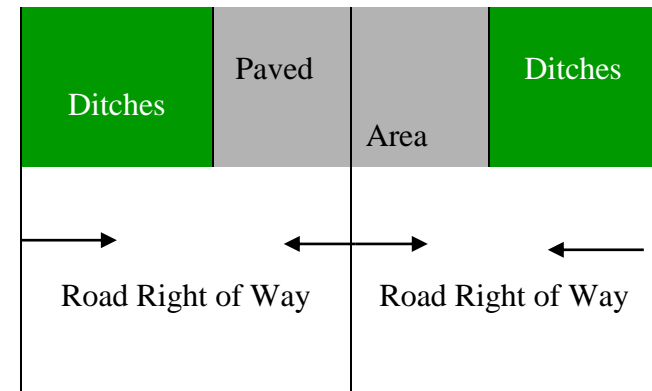

5. Leaves that are in non-compliance and therefore not picked up, will then be the homeowner's responsibility to remove.
6. Weather dictates as to how soon after the start date your leaves are collected.
7. Once the crew has gone down your street, it is considered the one and only pass on your street (whether your leaves were out or not.)

GARBAGE REMOVAL SERVICE

Residents of the unincorporated areas are responsible for the removal of their own waste. There are several waste haulers in the area; check with your homeowner's association or your neighbor for references. Keep in mind the fewer trucks in an area helps to prevent long term damages to the roads.

PARKING VIOLATIONS

An Ordinance is in effect in unincorporated Winfield Township that prohibits parking on roads or the road right-of-way at any time. Ordinance #2013-07 was adopted November 18, 2013. The Township has chosen to enforce this ordinance due to parking conflicts with safety and emergency vehicles.

Parking Violations will be issued to vehicles and/or other equipment parked on Township roads or the road right-of-way. The \$50.00 fine can be paid by mail in the envelope provided or in person at the DuPage County Clerk of the Circuit Court, 505 North County Farm Road, Wheaton, IL 60187.

Temporary parking permits will be issued for **special occasions only** and must be arranged at least **three days in advance** by calling the Winfield Township Road District Office at 630-231-8850.

Township road right-of-ways are not to be used for parking of trailers, boats, campers, etc. These items are to be stored on homeowner's property in accordance with the DuPage County Zoning Regulations.

SNOW & ICE CONTROL

Winfield Township begins salting when the snow starts to accumulate and traffic safety is affected. We spread rock salt treated with a liquid organic based deicer, which will melt snow and ice when ambient temperatures are as low as 0 degrees. The Township's goal is to remove snow and/or ice from the road pavement with a minimal amount of impact on the environment.

The Township will often post an area by subdivision using a sign similar to the one shown above. Streets that lead into a subdivision will be posted with this sign or one similar to it and the no parking ordinance applies to all the streets within a given subdivision. Vehicles parked in violation are subject to being ticketed.

Vehicles which are marked "For Sale" are also not allowed to be parked on Township Road Right-of-Way.

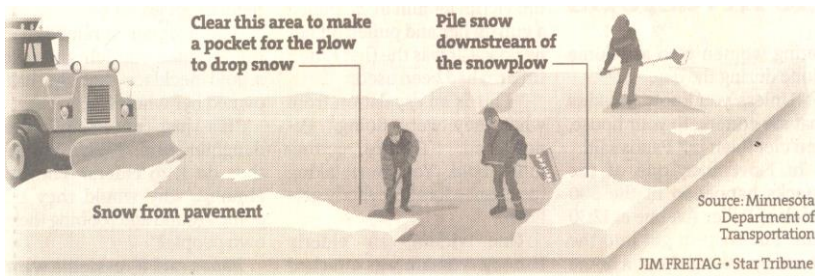

The Township has adopted a parking ban but relies on the cooperation of our residents. There is also a County wide No Parking ban and you can be fined for parking on the street and/or road right-of-way (see page 17 for more information). Please do not park on your street if snow is anticipated or has not yet been plowed. Parking on cul-de-sacs, dead ends, turn-arounds and on the street should be avoided when plow trucks are out. Parked cars in these areas prevent the plows from removing the snow properly and/or turning around and are subject to being towed at the owner's expense. Our crew does not intentionally "plow in" your drive nor aim for your mailbox. Our snowplows are of the same side delivery design as all other municipalities. This is the fastest and most efficient means to remove snow from streets. As a result, snow is discharged toward the road edges and inevitably into driveways. If possible delay the time you clear the driveway until the plows have cleared your street.

Garbage cans should be placed off the road and on your driveway to avoid being hit by the plow. Prompt removal of empty containers is also recommended.

Occasionally heavy slush discharged from a plow will knock down a mailbox. Most mailboxes, if properly placed and installed, will withstand heavy slush. The homeowner should periodically inspect and repair his mailbox in order to avoid it being damaged by heavy slush. The Township will not be responsible for damage to improperly placed or neglected mailboxes. If your mailbox meets specifications and is damaged as a result of our work, contact the Road District and we will replace it.

A SMART WAY TO SHOVEL YOUR DRIVE

Here is a good way property owners can clear their driveways to reduce the possibility of becoming snowbound after plows complete their work. By shoveling or plowing snow in the same direction as traffic and making a snow collection pocket, the snow collected by the plows will accumulate in the pocket rather than into the driveway opening.

GARBAGE CANS

The Township is not responsible for damaged garbage cans. Placing your garbage receptacles well within your driveway, far enough away from the path of the snow plows will help to prevent your garbage cans from being damaged. This teamwork will also help your refuse collector to have a clear and full access to your receptacles. Your full cooperation is greatly appreciated by all.

MAILBOX INSTALLATION GUIDELINE

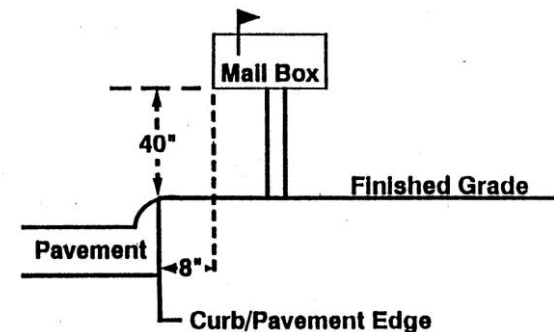

The following Postal Service guidelines apply to the installation of a rural style mailbox on a post in front of your home.

The bottom of the mailbox should be forty (40) inches above the ground. The front of the mailbox should be eight (8) inches in from the back of the curb or edge of the road or shoulder. Posts should be 4 x 4-inch wood posts or a two (2) inch thin-wall steel pipe. Not acceptable are mailboxes closer than eight (8) inches or protruding into the street. Not acceptable are posts larger than 4 x 4 such as railroad ties, mailboxes in brick piers, I-beams, etc.

Snow removal for mailbox approaches is the responsibility of the homeowner when mailboxes are not installed according to the guidelines.

If installed properly and the mailbox is damaged by Township equipment when snow plowing, we will replace it with a "standard" 4 x 4 wood post and support. Mailbox replacement is the standard box, model 1C. If the post is damaged, it will be repaired temporarily and replaced in the spring or summer. Not all mailbox damage is from the Township equipment. Old, rotted, rusted through posts, or vandalized boxes are not the Township's responsibility. If the mailbox does not conform to the above guidelines, the Township will not be held responsible.

Mailbox structures are a potential hazard and are not condoned by the Township. A homeowner wishing to construct a mailbox structure must obtain a permit to do so. In the event a mailbox structure is damaged, repairs/replacement is the sole responsibility of the property owner.

MISCELLANEOUS MAINTENANCE

Traffic Signs – We erect and maintain most of the stop, speed limit and caution signs on Township rights-of-way. Stop signs are inspected weekly and other signs are inspected each month. If you notice a missing sign, please notify this office so we may quickly replace it and avoid potential accidents. Stop Signs and Speed Limit Signs, new or changes to existing signs, are regulated by the DuPage County Engineer. Requests for signs or sign changes must come from the Township Highway Commissioner. Do Not Contact the County directly; contact the Road District office, 630-231-8850 to start the procedure.

Mowing – We mow rural area rights-of-way 4-5 times per season.

Ditch Work –

Not all ditches need to be re-ditched. This work is performed April to October. Ditching is scheduled by the area (subdivision), not necessarily by the address. Restoration to the worked area will be completed at a later time. You will be put on the ditch list when you call.

Asphalt Patching –
Potholes are filled as required.

Tree Removal – Trees that are dead on the Township road right-of-way are marked in the summer or early fall and then removed during the winter season. The Township does not prune or trim trees.

Litter Pick-up – Performed as necessary.

Right-of-way – Usually 33' from the pavement centerline. R.O.W. is for the exclusive use of the Township and Utilities.

R.O.W. is not to be used by the homeowners, Keep the following on the homeowner's property:

1. Fences (including invisible dog fences)
2. Plantings (Keep landscape plantings off the R.O.W)
3. Additional drainage (Altering existing drainage is not allowed)
4. Decorative landscape
5. Sprinkler Systems

Do not use the road pavement or R.O.W. for dumping gravel, mulch, black dirt, etc. All materials and/or equipment should be on the homeowner's property

Block Parties – Advance notification is required when planning a block party. Residents assume complete responsibility for this activity which includes notifying the DuPage County Sheriff's office as well as the appropriate Fire Protection District. At all times residents who live in the area must have access to their property. Signs are available at the Road District office. A deposit will be required when picking up signs and will be returned when signs are brought back to the Road District.

YOUR HELP IS NEEDED

To help keep costs down and consequently keep your taxes down, we offer the following suggestions:

Brush Pick-up – Please do not throw your brush into a tangled heap. Do not pile it too high. Do not bring it out after the truck has passed. It will not be picked up until the next scheduled month. It will help expedite the work if instructions are followed.

Leaf Pick-up – Rake leaves next to the road. The suction hose extension will not reach too far.

Snow Plowing – Please move cars off the street when you hear the forecast predicting a snowfall. It helps us to do a better job. **Do not clean your driveway into the street. It presents a hazardous condition to motorists and is against the law. Keep your garbage cans in your driveway on those snowy days.** Helpful hint: When facing the street, pile snow on the right side of your driveway to help avoid the snow plow re-dumping snow into driveway.

General – Newly seeded areas need water. Please help us to water them.

Street Lights – Within unincorporated Township areas street lights are maintained by ComEd. If you see a street light with a burned-out bulb call ComEd customer service number, 1-800-334-7661. Should a replacement not be made within a reasonable period of time, please call this office. Street lights, if needed in a subdivision, require a petition requesting their installation with the understanding that cost for labor and material will be assessed to the homeowner. After installation, monthly rate usage and maintenance fees are paid from Township funds.

Safety First! – Please watch for construction signs and construction crews working on a project. Slow down and be careful.

Abandoned Vehicles – When reporting an abandoned vehicle, which is parked on the Township Road Right-of-Way, include the following information: make, model, color, location and license plate number.

PATCHING/PAVING

“When is my road going to be repaved?” is a frequently asked question. Typically, roads in a specific area of unincorporated Winfield Township are re-surfaced every ten years. However, due to rising paving prices and budget restraints, the re-surfacing schedule has been delayed by three to four years. The schedule for patching/paving is as follows:

Paving in 2017

Northwoods Subdivision:

Hawthorne Lane	Northwoods Drive
Hickory Lane	Elm Drive
Robin Lane	Burr Oak Drive

Hoy Avenue (East dead end to St. James Farm)
Madison Street (Butterfield Rd to Hoy Rd)

This list is tentative and streets may be deleted to accommodate the prices in the contract.

STORM DRAIN STENCILING

Why stencil the message "DUMP NO WASTE - DRAINS TO RIVER" on storm drains? Here are some good reasons:

Protect Local Streams and Rivers - Local Citizens are Now the Largest Polluters! :

Historically sewage treatment plants and other large facilities have been the cause of most water pollution in our area. However, in recent years the DuPage River Coalition has been monitoring local sewage treatment plants, and working with them to improve the quality of the discharge from these facilities. As a result, the largest polluters are now local citizens. Although any one person does not come close to dumping the amount of waste of a large facility, there are millions of citizens in the DuPage River Watershed, and it all adds up! The next level of improving water quality is to increase awareness of local citizens.

To Increase Awareness of Water Drainage Systems:

Most polluters do not even realize they're polluting. Many people just don't realize that storm drains funnel water directly to the river--there is no treatment plant in between. Therefore, to dump waste down a storm drain is the same as walking up to the banks of a river and dumping the waste right in. Knowing this, most people would not dump used oil down the drains when changing the oil in their car or sweep grass clippings into the drains.

To Promote a Behavior Change in Local Citizens:

Once people realize the water drainage system, they may begin to think more about some of their habits. For instance, people may never consider the act of purposely dumping oil directly into a river. However, many cars leak oil on driveways that runs down the driveway and into the storm sewer. By not fixing the leak and allowing the oil to go down the storm drain, people cause the same effect as dumping oil in a river.

Common Pollutants:

Antifreeze, household chemicals, garden chemicals, fertilizers, pesticides, pet wastes

Here's How You Can Participate:

Storm drain stenciling is a fun way to get a group of friends, scouts, neighbors & co-workers together while spending time outside. You can spend as much or as little time as you have. It's so simple and flexible. The Conservation Foundation supplies everything you need at no charge to you and all we ask is that you fill out a form to tell us the number of drains stenciled, what you found there and how many friends you got together. Drain maps are available from your community.

To learn more log onto www.theconservationfoundation.org and search *Storm Drain Stenciling* and you can see how to get started.

More information is available at DuPage County, go to:

***We Remember the
Men and Women of
Our Armed Forces
Who Defend Freedom
Throughout the World.
We Support Them and the
Job They Are Doing.***
